

KANGKAN JYOTI BORA

SENIOR SOFTWARE
ENGINEER (SE2)

PHONE | (+91) 7022835279

EMAIL | borakangkan1.1.91@gmail.com

LOCATION | Bengaluru, INDIA

EXPERIENCE | 8 Years 5 Months

Key Skills

- Development
- Node Js Backend Developer
- Golang Developer
- AWS
- AWS Cloud
- GCP
- Terraform
- SQL Server
- MongoDB
- Redis
- GraphQL
- GraphQL Apis
- Javascript

Certification

- Cisco Network Certification 15 Days Training

Languages

- Assamese
- Hindi
- English

Profile Summary

I hold an MCA degree from Tezpur University and boast over 8 years of experience in backend development, specializing in Node.js and GoLang, as well as application development. Currently, I am contributing my expertise to Condenast India Private Limited as a Software Engineer 2 since December 2021. Over the course of my tenure, I have honed a diverse skill set, including:

- * Node.js and GoLang for efficient backend development.

- * Database management with expertise in MySQL, MS-SQL Server, MongoDB, and Redis.

- * Proficiency in leveraging cloud platforms such as Amazon AWS, Microsoft Azure, Microsoft BOT framework, and Blockchain Framework (Hyperledger Fabric) for scalable and secure applications.

- * Hands-on experience with Docker, Kubernetes, and Terraform for seamless deployment and orchestration of applications.

- * Utilization of performance testing tools like Jmeter and Jprofiler to ensure optimal performance and reliability.

I continuously strive to stay updated with emerging technology.

Work Experience

Tezpur University

Grade - 7.78/10

B.Sc - Computers

2012

Guwahati University

Grade - 73%

12th

2009

Assam , English

Grade - 55-59.9%

10th

2007

Assam , Assamese / Asomiya

Grade - 70-74.9%

Projects

LubeChat

1553 Days

A chatbot using React and integrate the UI with backend services to provide customers competitive lubricant business insight as well as helping customers to decide to pick on a lubricant product. The technology used in this space is - Node.js, React.js, Azure Cloud Service

Lube Planner

366 Days

An end to end web application for implementing, plan services for lubricant plants for the petroleum business vertical. Golang microservices Git, Jenkins, Github Actions (CI/CD).

STEAM

334 Days

An end to end web application for implementing, planning trading and supply chain monitoring for lubricants for Shell Petroleum. Here we have successfully ported a conventional desktop application to a web application. Golang microservices Git, Jenkins, Github Actions (CI/CD).

Aggregator GDS

122 Days

An aggregated Global Distribution System which collects all data from different available GDS for Bus ticket booking which will give customers a very rich

amount of search results including local travel agencies.

License Manager

700 Days

Creating API keys and Licensing them for API calls. It is a micro service written in GoLang which provide API keys to the clients.

Localization Manager

122 Days

REST Api for Localizing English language to other Indian Languages. Working as a project engineer for scaling and developing the application framework for Client.

Content Service

28 Months

One Content service to rule them all! A GraphQL API for querying Cond?? Nast content from Content APIs.

Conde Nast has a huge amount of digital content for all its fashion brands so this GraphQL service enables the brand's Web apps as well as Mobile apps to consume that digital content using this GraphQL API. It has a federated GraphQL which supports subgraphs for different interdependent GraphQL services.

Technology Used - Node.js, JavaScript, Apollo Graphql libs , Redis, Events.

Content API

28 Months

A collection of all (most) of the packages that power the Content APIs. It is a GoLang web service to power the GraphQL API which feeds data into MongoDB and uses Elastic search to power the search functionalities with custom Elastic search analyzers.

Technologies used - GoLang, MongoDB, Elastic Search, AWS SNS libs for events .
